BISMARCK

AGORA
MODELS

Your 1:200 scale model is packed with intricate details such as the on-board Arado AR 196 aircraft set up on catapults, railings, control stations and rigging cables, plus a host of motorized features operated by remote control.

ANCHORS: The anchors can be lowered or raised at the touch of a button!

HEAVY ARTILLERY: The four 38cm gun turrets can be controlled in two ways. The towers rotate and the guns can be raised or lowered.

BRIDGE: High up on the foremast, the admiral's bridge is illuminated.

LIGHTING: Featuring seven searchlights, bridge lighting and red and green port and starboard indicators as well as bow and stern lighting.

MEDIUM ARTILLERY: All six 15cm gun turrets can be turned by remote control.

Making your Bismarck

- 3D Scanning**
 Replicated in detail using photographs and descriptions from the time, and reproduced using the latest 3D modelling techniques.
- Moulding**
 The 3D images capture every single component of the Bismarck, and are then used to create a series of over 200 individual moulds from which the model parts are formed. The moulds are made from solid steel, some of which weigh over 1 tonne, and can measure over 1m³ (35ft³). Each mould is inspected by hand to ensure the resulting parts maintain the original detailing of the initial laser scan. An alloy metal known as 'zamak' is used for casting to give the desired combination of light weight, durability, and fine detailing.
- Painting**
 Once the parts have been formed they are sprayed in the striking camouflage pattern painted on Bismarck before combat operations began.
- Production**
 Our scanning and design process will usually take up to six months. After a further four months of engineering for each mould, the final parts are ready to be produced in our state-of-the-art factory. All stages of the design and production are carefully vetted and approved by our expert team here at Agora Models.
